

MINI DRONE WORKSHOP

Date: 6/04/2024 and 7/04/2024

Host: IET-On Campus CET

Number Of Participants: 10 participants (2 teams)

Objective: To make a working model of mini drone along with providing the required knowledge on drone making.

Workshop Format:

Day 1 : The workshop began with theory classes on the basics of drone making followed by doubts sessions.

Day 2 : Day two consisted of a hands on session where the participants where using the knowledge they earned to make a real life mini drone.

Conclusion:.

IET-On Campus CET conducted the Mini Drone Workshop as part of Drishti'24. The two day workshop gave the participants hands-on experience in drone making.

The workshop kicked off with theory classes. Mentors explained the basic principles of flight, drone components, and safety regulations. This interactive session included a lively Q&A, demonstrating the participants' keen interest.

Following the theory, the workshop transitioned into a hands-on learning experience. Club members, acting as mentors, guided participants through the assembly process.

The highlight of the workshop was the flight practice session held in a designated indoor space. The Mini Drone Workshop proved to be a resounding success.
